## Emergency Medicine Residents' Association

Welcome to the EMRA 2022 Representative Council Meeting during CORD22. Thank you for participating and ensuring your program is represented.

To access your ballot, please use the voting credentials shared with you when you checked in.

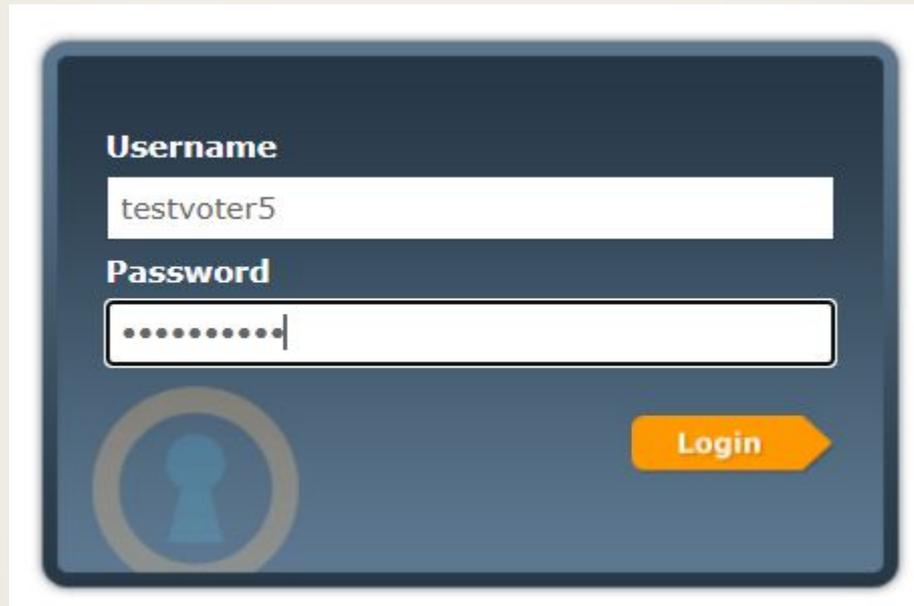

A dark blue login form with two white input fields labeled "Username" and "Password". Below the fields is a blue circular icon with a white silhouette of a person. To the right of the icon is an orange arrow-shaped button labeled "Login".

Need help voting? Please contact Heather Deja at [hdeja@emra.org](mailto:hdeja@emra.org)

# ELECTRONIC VOTING

A screenshot of a login interface for an electronic voting system. The interface is dark blue with rounded corners. It features two input fields: one for the username, which contains the text "testvoter5", and one for the password, which contains a series of dots. Below the password field is a circular icon with a blue silhouette of a person. To the right of the password field is an orange arrow-shaped button labeled "Login".

# ELECTRONIC VOTING

If you get a message that says “invalid username/password” check your login credentials.

Re-type or try copying and pasting. If using the copy and paste option, make sure you didn't accidentally pick up a space when you copied.

If you get a message that says “there are no active ballots”, it's not time to vote.

Refresh the page when the vote is called, or click “Home” .

# ELECTRONIC VOTING

## Vote to NOT ADOPT

Open until March 28, 2022 6:00 PM (GMT-06:00) Central Time (US & Canada)

# TRIVIA RULES

**RAISE YOUR HAND TO ANSWER!!**

**1st CORRECT answer:**

**gets EMRA swag**

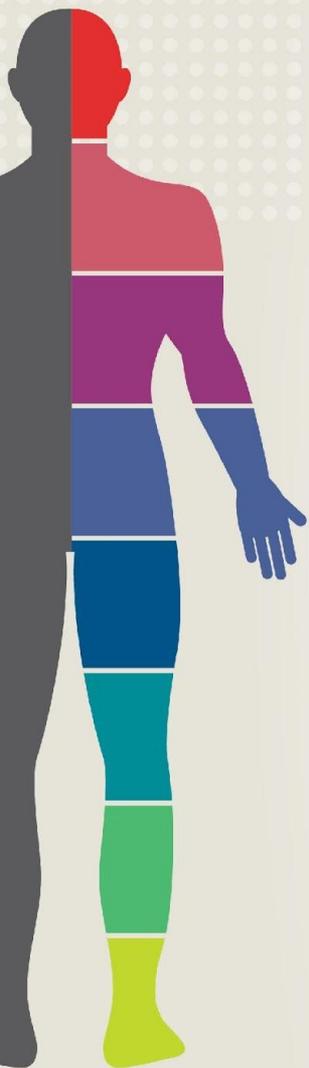

**Others with correct answers:**

**gets bragging rights...**

**No correct answer:**

**gets no love...**

# TRIVIA #1

Which medication is typically used in the long-term management of gouty arthritis?

- A. Allopurinol
- B. Colchicine
- C. Indomethacin
- D. Prednisone

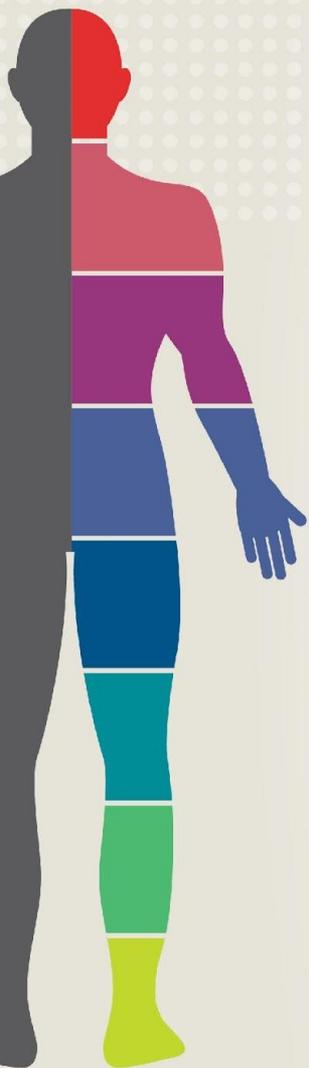

# ANSWER #1

Which medication is typically used in the long-term management of gouty arthritis?

- A. Allopurinol
- B. Colchicine
- C. Indomethacin
- D. Prednisone

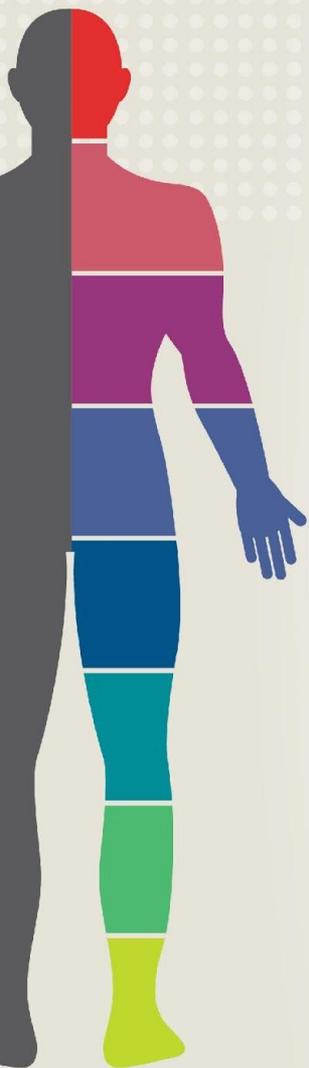

## TRIVIA #2

Which primary treatment modality will reduce the risk of acute renal failure in rhabdomyolysis?

- A. Furosemide
- B. Mannitol
- C. Normal saline
- D. Sodium bicarbonate

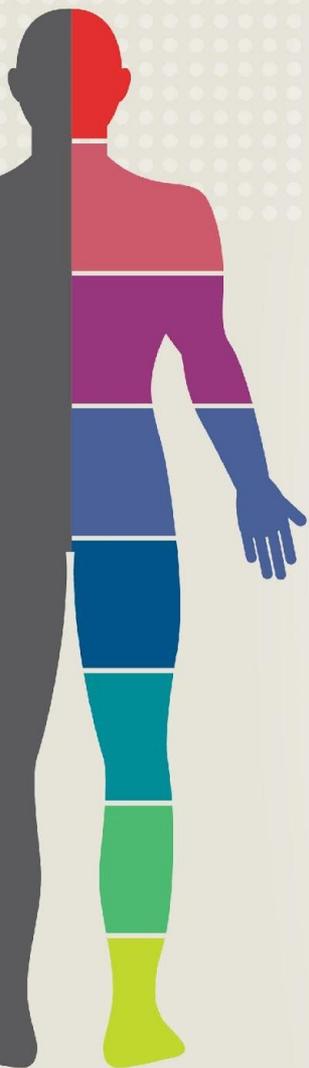

## ANSWER #2

Which primary treatment modality will reduce the risk of acute renal failure in rhabdomyolysis?

- A. Furosemide
- B. Mannitol
- C. Normal saline**
- D. Sodium bicarbonate

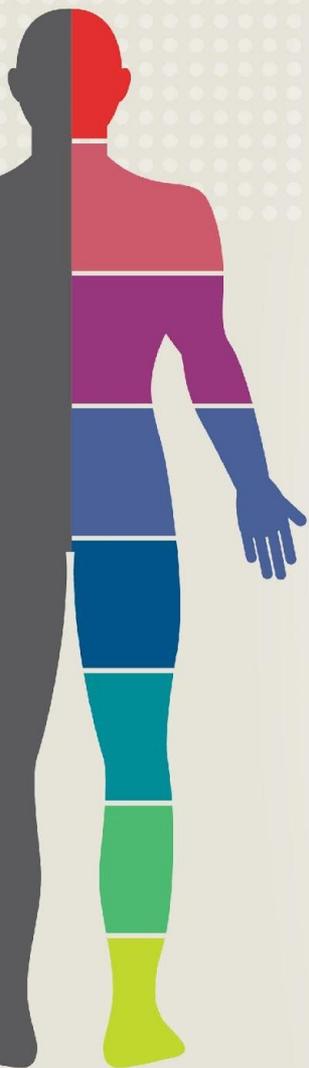

## TRIVIA #3

**Which characteristic distinguishes a complex febrile seizure from a simple febrile seizure?**

- A. Brief postictal period
- B. Lasts longer than 5 minutes
- C. Occurs in children <6 months old
- D. Temperature >39.5°C (103.1°F)

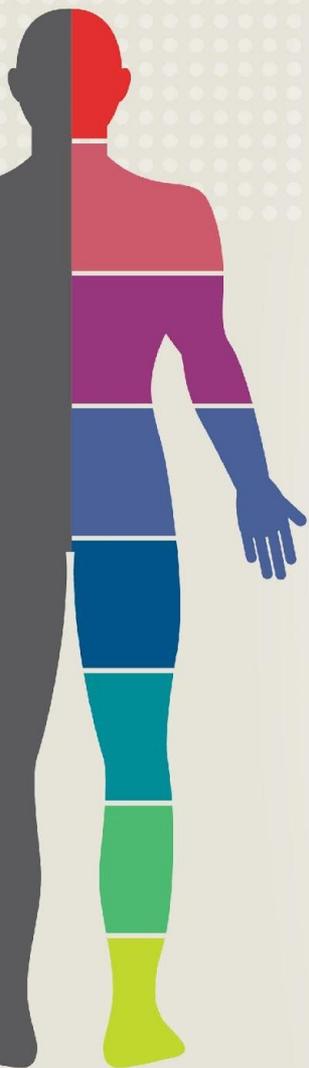

## ANSWER #3

Which characteristic distinguishes a complex febrile seizure from a simple febrile seizure?

- A. Brief postictal period
- B. Lasts longer than 5 minutes
- C. Occurs in children <6 months old**
- D. Temperature  $>39.5^{\circ}\text{C}$  ( $103.1^{\circ}\text{F}$ )

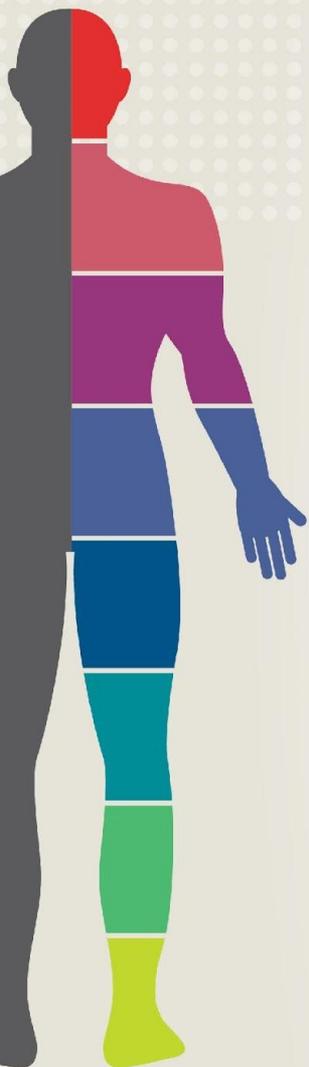

# TRIVIA #4

What is the most common etiology of ARDS?

- A. Aspiration pneumonitis
- B. Pancreatitis
- C. Sepsis
- D. Trauma

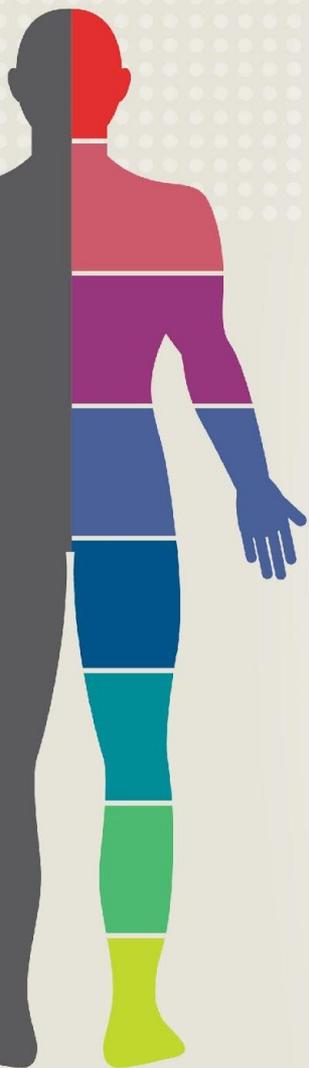

# ANSWER #4

What is the most common etiology of ARDS?

- A. Aspiration pneumonitis
- B. Pancreatitis
- C. Sepsis**
- D. Trauma

## TRIVIA #5

Which constellation of symptoms is most consistent with trigeminal neuralgia?

- A. Constant burning nerve-like pain with a vesicular rash
- B. Jaw pain associated with clicking and popping while chewing
- C. Right-sided shock-like facial pain brought on by brushing teeth
- D. Unilateral sharp headache with rhinorrhea and lacrimation

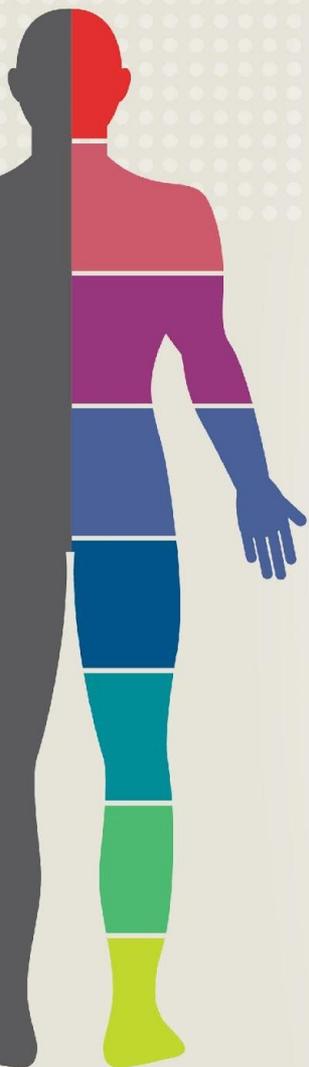

# ANSWER #5

Which constellation of symptoms is most consistent with trigeminal neuralgia?

- A. Constant burning nerve-like pain with a vesicular rash
- B. Jaw pain associated with clicking and popping while chewing
- C. Right-sided shock-like facial pain brought on by brushing teeth**
- D. Unilateral sharp headache with rhinorrhea and lacrimation

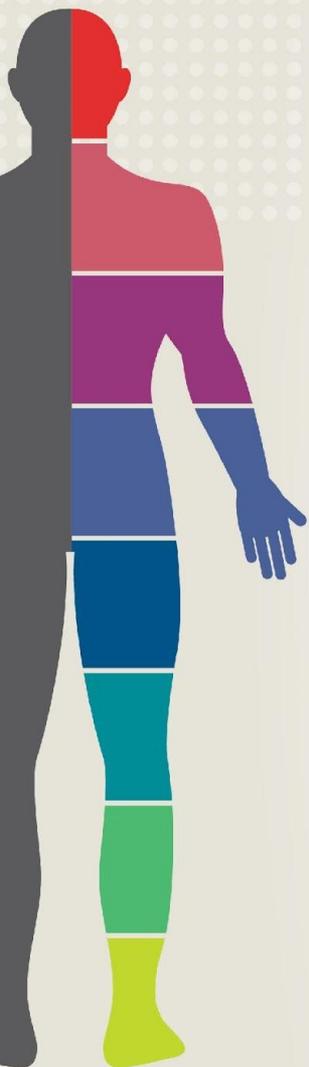

## TRIVIA #6

An 18-year-old woman presents with fever, atrial fibrillation, and congestive heart failure. She is currently taking levothyroxine. What is the most likely diagnosis?

- A. Graves disease
- B. Myxedema coma
- C. Thyrotoxicosis factitia
- D. Wernicke-Korsakoff syndrome

# ANSWER #6

An 18-year-old woman presents with fever, atrial fibrillation, and congestive heart failure. She is currently taking levothyroxine. What is the most likely diagnosis?

- A. Graves disease
- B. Myxedema coma
- C. Thyrotoxicosis factitia**
- D. Wernicke-Korsakoff syndrome

# TRIVIA #7

Which finding is more likely to be seen in an electrical injury from a lightning strike rather than from household electricity?

- A. Compartment syndrome
- B. Cutaneous injuries
- C. Myoglobinuria
- D. Ventricular fibrillation

# ANSWER #7

Which finding is more likely to be seen in an electrical injury from a lightning strike rather than from household electricity?

- A. Compartment syndrome
- B. Cutaneous injuries**
- C. Myoglobinuria
- D. Ventricular fibrillation
